The World's Leading Trade Fair for the Automotive Industry

Frankfurt am Main, 11–16. 9. 2012

## Leading International Trade Fair for Service Station and Car Wash

Despite the cancellation of the Frankfurt Motor Show (IAA), the first Automechanika was held in Frankfurt 40 years ago, on 18 September 1971, and the service-station and car-wash sector has met regularly in Frankfurt every two years since then.

At the last Automechanika, around 155,000 trade visitors saw a variety of car washes and the latest car-care products 'in action'. Around 80 percent of all visitors, half of them from outside Germany, said they were very satisfied to satisfied with the range of products and services at Automechanika 2010.

The subject of electro-mobility will continue to gain significance in 2012. For the first time energy providers, e.g. EON, have announced their participation in Automechanika. No other event covers the entire value chain so completely from original equipment, conversions and vehicle and shop accessories to waste disposal and recycling. However, it is not only filling-station operators who need to rethink their position. Thus, the main themes at the coming Automechanika in Frankfurt from 11 to 16 September 2012 will also include public and private re-charging infrastructure, the demands on dealership and workshop equipment and training.

## Prime position

On the large outdoor area right next to the "Portalhaus" entrance you'll find manufacturers of gantry, in-bay and tunnel Car Wash facilities as well as washing chemicals. What's more, the adjacent Hall 10.0 offers great solutions for filling stations (e.g. fuel billing systems, filling station planning, construction and equipment, refuelling systems for alternative fuels, security surveillance and outdoor advertising). The offer is rounded off in Hall 9.1 with its comprehensive range of lubricants and vehicle care products.

Memories of the early Automechanika years – washing brushes, which were also shown outdoors then. The first Automechanika in 1971 attracted around 500 exhibitors and 75,000 visitors from 63 countries to Frankfurt.

"For us as the leading manufacturer of car-wash systems, the Automechanika in Frankfurt is the most important fair for showing our spectrum of products to national and international customers and potential customers. And the new 'Car Wash City' section spotlights the subject of 'washing cars' perfectly."

Stefan Schwarzer,  
Sales Manager,  
Otto Christ AG, WASH SYSTEMS

"We are already looking forward to Automechanika 2012. It is the perfect meeting place for all members of the worldwide Liqui Moly family."

Peter Baumann,  
Head of Marketing at  
Liqui Moly GmbH

"The Automechanika has held a fixed place in the calendar of events of ROWE MINERALÖLWERK GMBH for many years. It is not only for us as exhibitors but also for trade visitors the ideal venue for making new, high-quality contacts and cultivating existing ones. The exhibition coupled with special shows, lectures and workshops makes the Automechanika the perfect event for the specialist world."

Michael Zehe,  
CEO, Partner, ROWE  
MINERALÖLWERK GMBH

"We occupied a stand of 150 sqm at Automechanika 2010 with our mother company TATSUNO Corporation. This fair was an initial step of TATSUNO Corporation/Japan for spreading their activities through Tatsuni Europe. The fair was perfectly organised for us as exhibitors and – as I heard from our partners – for the visitors, too. I am looking forward to meeting all the nice people in 2012."

Petr Krejcir,  
Commercial Director,  
Tatsuno-Benč Europe a.s.

# automechanika innovationaward

Climate protection is the challenge – innovative expertise in the development of sustainable mobility is the answer. Companies that promote themselves through innovative solutions have the opportunity of winning the Automechanika Innovation Award and attracting even greater publicity. Send us your entries! [www.automechanika.com](http://www.automechanika.com)

# automechanika greendirectory

Environmentally friendly solutions and even more efficient water consumption are particularly in demand in the car wash business. The "Green Directory", launched at Automechanika 2008, points out to visitors solutions that make car washes even more efficient. A separate visitor brochure with integral guide gives information about the individual products. Come and join us!

"Automechanika is an important event where Petrotec will be able to promote its products and establish strategic partnerships with new customers from international markets, as well as to consolidate and reinforce its existing partners distribution network. It is also a crucial platform for new products and innovative solutions launching."

"As one of the first exhibitors, we can look back over a long and trusting relationship with Messe Frankfurt. For us, the Automechanika continues to be the most important trade fair for car washes and workshop cleaning. Therefore, we will be back again in 2012 to present the economical and environmentally friendly Kärcher solutions in Car Wash City and on the outdoor area."

"Tokheim has been presenting its latest products at the Automechanika since 1976. The show gives us a great opportunity to meet our customers, potential customers and suppliers from all over the world. We begin planning our presentation at this fair a good year in advance so that we can all enjoy the unique atmosphere in Frankfurt."

José Simão Cabral,  
Chairman Petrotec Group

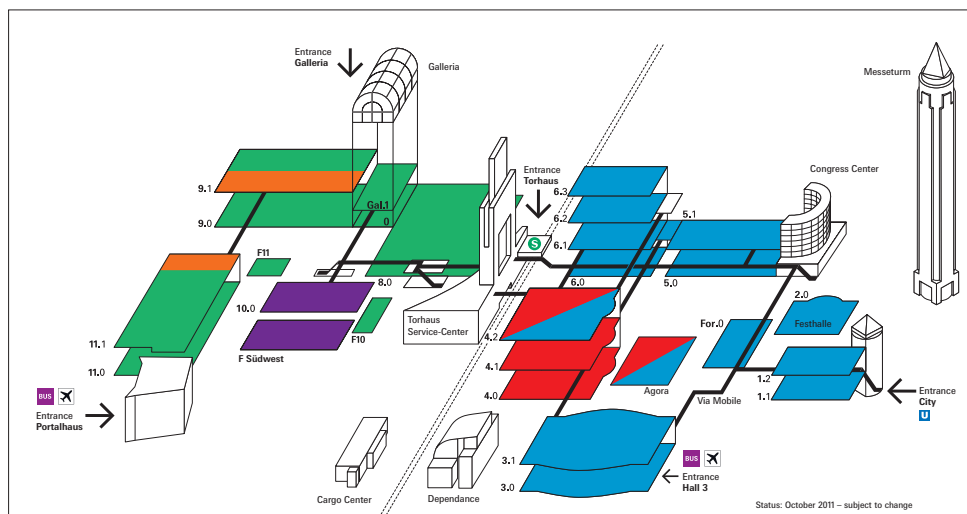

Rolf Funk, Head of the  
Industrial Cleaning Systems  
Business Unit, Alfred Kärcher  
Vertriebs-GmbH

Bill Arundel,  
Sales & Marketing Director,  
Tokheim
